The new Federal Government of Veneruela has just appointed Senor Bias Brusual, a citizen of that republic, to be Envoy Extraordinary to the Government of the United States. The appointment of a Minister of such exalted rank is an henor-conferred by that republic upon no other nation, and one which our Government will duly appreciate.

Mr Brusual is a statesman of enlightened, liberal views, and is strongly averse to European medding in the affairs of this continees. He is opposed to a state religion, and is favor of full toleration; is a strong anti-clavary man, and an ardent friend to the cause of our Union. The appointment of such a Minister to our Government at this time is significant.

this intelligence the acute and diplomatic core cutter immediately elarated for Washington, and, having escaped the toils of the rebellywises, whom Ray Van Winkie Wellas allows to rule the wave, he arrived in safety at that goodly but ungrudy city.

Again in Washington, Dr. Zacharie called upon his friend, Secretary Banton, who, mistaking him for some visionary fillow, like devert, refraced to Batton to his story. The Doctor then left Shanton and woul to the President's private reception room, the Chief Executive held out his foot and complained of his cores. Your tunnediste duty in report to Missoun now is to serves the efficiency of that establishment, and to so use it, as far as prescription, to compel the excited people there to leave out another alone.

Under your recent order, which I have approved, you will only arrest individuals, and suppress assemblies or newspapers, when they may be working palpable injury to the military in your charge; and in an other case will you interfere with the expression of opinion in any form or allow it to be interfered with violently by others. In this you have a discretion to express with great castio, calments and for bearrance.

With the matter of removing the inhabitions of certain counties on masse, and of removing certain individuals from time to time, who are approsed to be mischevious, I am not now interfering, but am leaving to your own discretion.

A controversy in regard t rapidly grew into ainost unmanageable; portions. One side ismored the nocessity, magnified the swils of the system; while other ignored the evils and magnified necessity; and each bitterly asalled motives of the other. I could not fail to that the controversy enlarged in the same; the President should have virtually motives of the other. I could not fail to see that the controversy enlarged in the same proportions as the professed Union men there distinctly took sizes in two opposing political parties. I exhausted my wits, and vary nearly my patience, also, he sizes in two opposing political parties. I exhausted my wits, and vary nearly my patience, also, he size is and vary nearly my patience, also, he size to could be cured by a tring either party a victory over the other. In this view and not to ban or brand General Curitis, or to give a victory to any party, I made the change of Courtander for the Department. I now learn that so on after this change is more lastinety complained of than in any conduct of the change. bers of his Cabinat were avowedly our opponents, and that their presunce in Washington abldes, while necessarily ours could be but transient. Their influence has doubtless triumphed for the time; but it is a short lived triumphed for the time; but it is a short lived triumphed even if continued to the end of the Fresident's official term. Before that time the people will have pronounced their verdict. In the trial which is to precade its rendition, it is your duty and mines to perform our parts steadily and manfally, unrepressed by present failure, and unawed by official opposition, however potent.

In connection with the remarks of the President concerning General Schofield, it is due to myself and the D. legation, and necessary

1. Imbeelity:
2. That General Schofield, on purpose to protect the Lawrence murderers, would not allow them to be pursued into Missouri;
8. That General Schofield has purposely withheid protection from loyal people, and purposely facilitated the objects of the dialoyal. I gave the new commander no instructions as to the administration of the system mentioned, beyond what is contained in the private letter, afterwards surreptitiously published, in which I directed him to not solely for the public good, and independently published, in which I directed him to not solely for the public good, and independently published, in which I directed him to not solely for the public good, and independently published, in which I directed him to not solely for the public good, and independently on the presented me, nor anything 4 have otherwise to the public good and the late massacre, at Lawrence, Kunsas is presented as evidence of that imbedility. To my mind, that fact scarcely tends to prove the proposition. That massacre is only an example of what Grierroon, dolm Morgan, and many others, might have repeatedly done on their respective raids, had they chose to incur the personal hazard, and possessed the dendish hearts to do it.

s. That General Schoffeld has purposely withheld protection from loyal people, and perposely heditated the objects of the disloyal. When I say to you that no such charges were made, either in the address of the delegation, or in the letter of their Executive Committee, (both of which have been published, and that I heard no such charges made by any one in our interview with the President, you will understand my surprise at his reference to them. For myself, I feel bound in honor to say, thus publicly, that I have no knowledge which would lead me to make or believe any of those charges. For was, as a member of the delegation and the Executive Committee, and as the surface and the letter, I fell tustified in sanding his administrative, of the Department of the Missouri, on the grounds stated in those documents; but not in hying to his charge any of those three emmerated points. And I am unable to say with certainty whence those charges proceeded. Of course they were before the President, or he would not have noticed them. You will observe that he refore to flow documents; but not in hying to his charge any of those three commented points. And I am unable to say with certainty whence those charges proceeded. Of course they were before the President, or he would not have noticed them. You will observe that he refore to flow documents submitted to him on the left of October. One was the letter of the Executive Committee; the others were statements made out by sub-committees of the Delegation from three Congressional Districts, and supposed to embody merely representation. Those three documents were not reheated to the Delegation or the Executive Committee; the others were statements made out by sub-committees of the Delegation or the Executive Committee in the others and the proper and the proper and the construction of the proper and the raids, had they chose to incur the personal beards, and possessed the flendish hearts to do it. The charge is made that Gen. Sahofield, our purpose te protect the Lawrence murderers, would not allow them to be guzzed into Missouri. While no panishment could be too andden, or too server for these marderers, an well satisfied that the preventing of the threatened remedial raid into Missouri, was the only safe way to avoid an indiscriminate massacre there, including probably more innocent than guilty. Instead of condensing, I therefore approve what I understand Gen. Schodield did in that respect. The charges that General Schodield has purposely withheld protection from Joyal people, and purposely selfithisted the objects of the disloyal, are altogether beyond my power of bellef. I do not arraign the versality of gentlemen as to the fact of the complained of that I do more than question the Judgment which would infer that those facts occurred in accordance with the purposes of General Schodield.

With my present views, I must decline to

would inter that those facts occurred in accordance with the purposes of General Schofield.

With my present views, I must decline to

THE ANY CEMPEY. That some time in the most of June last, in company with Mr. P. B.

Sing, I see Mr. Hodgine of Lincoin, from whom I learned that he had at his house a Grover & Baker, in Chicago:

That he was the county of the

Machine with ner, to be kept or retarned at her option.

I also state that Mr. Hodgins' name was upon
the published hat of Sewing Machine Committee
at the approaching State Fair for Illinois,
at the property of the Hodgine state he still had said Machine, and presumed be should keep it.

"He (You Epp) had, while Super intendent of the Department to which Seesing Machines were exhibited, born SILENTLY APPROACHED with a prient of a Wheeler & Histon Seeding Machine, and a receipted bill for the same." The pries was generally a Wheeler & Histon Seeding Machine, and a receipted bill for the same.

This attack upon the reputation of the President of the Illinois State Fair, Hon, W. H. Van Epps, was promptly reacuted in his behalf, by the friends of Mr. Van Epps in this city, che of whom addressed thin a letter, calling his attention to the assault.
